ARITCO DESIGN CONCEPT

Design concept Abu Dhabi
by Alexander Lervik

The capital of the United Arab Emirates and a city that is growing rapidly. It has an exciting mix of traditional Arabic architecture and modern buildings.

The Abu Dhabi design concept convey a sophisticated and luxurious feel and the whole concept is inspired by the gold color scale. The lift is painted in a gold shade scale color with pearl effect. The traditional Persian patterns have inspired me when I created the DesignWall pattern.

- Alexander Lervik

Lift color: Gold
DesignPanels: Oak
DesignWall: Abu Dhabi
Control panel color: Gold
Flooring: Bolon Truly Precis

Aritco HomeLift DESIGN CONCEPT

Background

The **Aritco HomeLift** was launch 2016 and was the first of its kind. With its strong characteristics based on the Scandinavian design values, with open glass shaft and clean lines, it started a new era within home lift industry. Today Aritco is one of the leading brands and the category of home lifts are shaped by the look that Aritco once created.

Aritco is now launching a new series of features for customization possibilities. Enhancing the possibilities for owners to create that special look that fits their homes perfectly, Aritco gives you an opportunity to apply any picture or pattern that you want for the DesignWall, choose among more flooring options, covering panels patterns and colors of the lift. Hard to choose yourself? Check in one of our four to be launched concepts, designed by Alexander Lervik.
